DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of invention I in the reply filed on 10/12/2006 is acknowledged. Claim 13 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-4 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2328196 A ('196).

GB ('196) shows an apparatus (see fig. 1) for mooring a floating vessel over a seabed, comprising a partly submerged floating dock [13] with a thruster [21], a single point mooring system [10] and a rigid connecting member connecting the dock to the single point mooring system, wherein the dock is pivotally attached to the connecting member and the single point mooring system is attached to the seabed by a compliant anchoring system. The floating dock further comprises buoyancy means [19].

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3617

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 5, 6 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2328196 A ('196).

GB ('196) shows the single point mooring vessel attached to the seabed (see fig. 1). However, GB ('196) does not expressly show the single point mooring vessel comprising a floating buoy, or the buoy attached to the seabed by three equi-spaced anchor leg groups. Additionally, the single point mooring vessel does not show a winch mechanism.

The examiner takes Official notice that it is common and extremely well known in the art to provide a swiveling floating buoy — also known as a spider — to pivotably moor a vessel, such as the single point mooring vessel shown in fig. 1, and to attach the buoy to the seabed by three equi-spaced anchor leg groups. Therefore, it would have been obvious for one skilled in the art at the time of the invention to provide a swiveling floating buoy with the single point mooring vessel of GB ('196) so as to allow it to effectively weathervane, without damaging the riser. Further, it would have been obvious for one skilled in the art at the time of the invention to attach the buoy to the seabed by three equi-spaced anchor leg for achieving balanced and effective anchoring. Regarding the use of winch mechanism on sea vessels, such is notoriously old and well known in the art. A provision of such winch mechanism would not only have assisted material handling on the vessel, but also would have been capable of attachment — and therefore attachable — to another vessel and operable to facilitate entry of the vessel into the dock.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ajay Vasudeva whose telephone number is (571) 272-6689. The examiner can normally be reached on Monday-Friday 12:00 -- 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Joe Morano can be reached on (571) 272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
